

Ran on a Intel core i7-4790k overclocked to 4,83GHZ (105 bclk and a multiplier of 46) with 8gb of ram overclocked to 1398MHZ. Ran with both getting access to the same amount of RAM and cpu power.

## Mergesort vs insertion sort over different amount of elements

## Mergesort vs insertion sort over different amount of elements

## Problem 6:

Time it takes to sort an array over the cut off point from mergesort to insertion sort
